

TEST UPDATE OVA1

Mary M. Mayo, PhD, Medical Director

Effective July 20, 2015, PathGroup will no longer perform testing for OVA1, a proprietary Aspira Labs assay used for the evaluation of ovarian masses. To avoid disruption in services, PathGroup will manage orders for OVA1 testing through a Third Party Phlebotomy Agreement.

Aspira Labs will begin sending specimen collection kits to affected facilities immediately. All collection kits include specimen collection instructions, device and test requisition. To properly order testing, a completed requisition and specimen should be sent within the same collection kit to Aspira Labs via FedEx. If your account has a regularly scheduled FedEx pick up, the collection kit must be routed to Aspira Labs. If your account does not have a regularly scheduled FedEx pickup, collection kits should be sent to PathGroup. Once testing is complete, Aspira Labs will issue results directly to the ordering physician. Results will not populate on a patient report issued by PathGroup.

The orderable test code, OVA1, and specimen collection requirements will remain unchanged. **Additional collection kits may be obtained by contacting Aspira Labs at 1-844-ASPIRA1.**

ORDERING:

TEST CODE	TEST NAME	CPT CODE
OVA1	OVA1™	81503

SPECIMEN COLLECTION AND STORAGE:

SPECIMEN COLLECTION
<ul style="list-style-type: none"> - 1 Serum Separator Tube (SST) - Aspira Labs test ordering requisition
